## **REASONS FOR ALLOWANCE**

1. Claims 5-14 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 5 recites a functional molding composition comprising:

- (1) a plant-originated functional component,
- (2) a tabular mineral,
- (3) a ceramics component other than the tabular mineral, and
- (4) a resin,

wherein at least an external surface of a final molding structure is composed of the functional resin composition so as to exhibit the functionality.

The rejection of claims 5, 7, and 8 under 35 U.S.C. 103(a) as being unpatentable over Honda et al. (US 6,465,114 B1) in view of Panush (US 5,830,567) has been withdrawn in view of the amendments made to claim 5 in the amendment dated November 7, 2003 and the rejection of claims 5, 7, 8, and claims 11-14 under 35 U.S.C. 103(a) as being unpatentable over Okamoto et al. (US 6,156,817) in view of Cochran II, et al. (US 6,211,500 B1) has been removed given that the Applicants claim for foreign priority has been perfected based on the verified translation of Japanese Application 2000-025720 filed February 2, 2000.

Independent claim 6 recites a functional molding containing a resin, a plantoriginated functional component, a tabular mineral having a low hardness and cleavage, and a ceramics component wherein the functional molding is a core-sheath joining type or bimetal joining type molding constructed of an internal component X and an external Application/Control Number: 09/771,700

Art Unit: 1773

component Y wherein the resin components of the internal component X and the external component Y may be a single resin or a combination of two resins and wherein the plant-originated functional component A, the tabular mineral and the ceramics component are formulated into both the internal component X and the external component Y. Claims 9 and 10 incorporate all the limitations of claims 5 and 6.

The closest prior art is US 6,423,408 B2 however the rejection of claims 6, 9, and 10 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3 and 4 of U.S. Patent No. 6,423,408 B2 in view of Cochran II, et al. (US 6,211,500 B1) has been overcome by the filing of a terminal disclaimer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheeba Ahmed whose telephone number is (571)272-1504. The examiner can normally be reached on Monday-Friday from 9am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Thibodeau can be reached on (571)272-1516. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
